-  AquaDrain® SD is prefabricated angle element for drainage of the stairs outside.
-  It can be combined with other AQUADRAIN® or WATEC®DRAIN line drains for terraces.
-  Drainage provide reliable protection from frost damage and efflorescence caused by accumulated water.

-  It has adjustable joint and therefore it can be installed easy and fast.
-  There are no ugly stains nor appearance of calcification on the surface.
-  It accelerates drying of the natural stone.
