

IndorTec® THERM-E

1. AQUADRAIN® RD tape for corner bandaging
2. cement screed
3. ARDEX P 51 primer
4. ARDEX X 78 adhesive
- 5.1. IndorTec® THERM-E carrier mat
- 5.2. heating cable
- 5.3. IndorTec® THERM-E BF floor sensor EU, 230 V
- 5.4. IndorTec® THERM-E TD touch screen thermostat EU, 230 V ili IndorTec® THERM-E TM manual thermostat EU, 230 V
6. ARDEX X 78 adhesive
7. ceramic or stone paving

- Efficient heating and compensator of different system movements for long lasting and aesthetic value of paving.
- Simple processing thanks to optimum flat position and precise position of the heating cables in the carrier mat.
- Standard heating cable cross-section in any length and technology are the guarantee of maximum ease of laying and reliable operation.

- Quick heating of the paving because the heating cables are completely covered in adhesive and because 38 % less air cavity needs to be heated up.
- Time is saved, since cables do not move after they are put on their place in the carrier mat.
- Final paving could be stone, ceramic, carpet or parquet. This system is very good for large fortmats.
